

Email, Calendar & Customer Support Management

Project Overview

This project demonstrates practical virtual assistant support across email management, calendar coordination, customer communication, and administrative follow-up.

The workflow was designed to keep communication organized, make scheduling easier, ensure important messages are handled promptly, and maintain clear records of ongoing tasks.

Key Areas

- Gmail inbox organization and email management
- Email sorting, prioritization, and follow-up
- Professional email communication and responses
- Google Calendar scheduling and organization
- Meeting coordination and reminders
- Customer support and inquiry management
- Tracking pending requests and follow-ups
- Organizing information for easy access and reference

Tools Used

Gmail

Email organization, communication, filtering, and follow-up.

Google Calendar

Meeting scheduling, calendar organization, reminders, and coordination.

Google Workspace

Centralized document and information management.

Google Sheets

Tracking follow-ups, requests, and administrative information.

Workflow

Receive → Organize → Prioritize → Respond → Schedule → Follow Up → Update Records

The process helps ensure that important communication is not overlooked and that scheduled activities and pending requests remain visible and organized.

Skills Demonstrated

- Administrative Support
- Email Management
- Calendar Management
- Customer Support
- Follow-Up Management
- Information Organization
- Professional Communication
- Attention to Detail
- Task Coordination

Project Outcome

The project demonstrates the ability to manage everyday administrative communication and scheduling tasks in a structured way while keeping information organized and ensuring timely follow-up.
